DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19, 29-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns, Jr. et al.

Regarding claim 1, Burns, Jr. et al discloses on figure 10 a semiconductor memory comprising a first conductivity type semiconductor substrate 235; and one or more memory cells comprising an island like semiconductor layer 230, a charge storage layer 265 and a control gate 275, the charge storage layer and the control gate being formed to entirely or partially encircle a sidewall of the island like semiconductor layer, wherein an active region of at least one of said memory cells is electrically insulated from the semiconductor substrate.

Regarding claims 2-19, 29-35, Burns, Jr. et al discloses on figure 10 all the structures set forth in the claimed invention.

Regarding claim 36, Burns, Jr. et al discloses on figure 10 a semiconductor memory comprising a first conductivity type semiconductor substrate 235; at least one memory cell comprising an island like semiconductor layer 230, a charge storage layer 265 and a control gate 275, wherein the charge storage layer and the control gate

entirely or partially laterally surround at least a portion of a sidewall of the island like semiconductor layer; and wherein an active region of said memory cell is electrically insulated from the semiconductor substrate.

Regarding claims 37-45, Burns, Jr. et al discloses on figure 10 all the structures set forth in the claimed invention.

Regarding claim 46, Burns, Jr. et al discloses on figure 10 a semiconductor memory comprising a first conductivity type semiconductor substrate 235; at least one memory cell comprising a pillar shaped semiconductor layer 230 having a height dimension greater than a width dimension, a charge storage layer 265 and a control gate 275, wherein the charge storage layer and the control gate entirely or partially laterally surround at least a portion of a sidewall of the pillar shaped semiconductor layer, wherein the sidewall of the pillar shaped semiconductor layer extends vertically relative to the semiconductor substrate; and wherein at least a portion of the pillar shaped semiconductor layer of the memory cell is electrically insulated from the semiconductor substrate.

Regarding claims 47-52, Burns, Jr. et al discloses on figure 10 all the structures set forth in the claimed invention.

Response to Arguments

Applicant's arguments with respect to claims 1-19,29-52 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
